Office Action Summary	Application No. 10/757,032	Applicant(s) FREEMAN ET AL.	
	Examiner Richard Bueker	Art Unit 1763	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-16 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Duignan (WO 00/72224). Duignan (Fig. 5, for example) discloses an apparatus for deposition of material on a substrate including a target, a substrate to receive material from the target and a laser for ablating the target to deposit material onto the substrate. Duignan (page 20, lines 15-17) teaches that the distance between the substrate and target should not exceed 25 microns which is less than 1 mm as recited in claim 6. Duignan teaches (pages 27-30) that it is desirable to house the target in a cassette similar to videotape cassettes. Such a cassette inherently must include a window opening as recited in claim 16 in order to provide a path for the laser beam to reach the target. The target surface and substrate of Duignan are in contact with each other as recited in claim 5. It is noted that the definition of "contact" is not limited to only physical contact.

Claims 1-11 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Opower (5,725,914), who discloses an apparatus for deposition of material on a substrate including a target, a substrate to receive material from the target and a laser for ablating the target to form it into a plasma (col. 2, lines 30-35) to deposit material onto the substrate. Opower (col. 3, lines

Art Unit: 1763

34-39) teaches that the target can be in contact with the substrate as in claim 5, and that the target can be partially transparent as in claim 9 (col. 14, lines 19-22).

Claims 2 and 10-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Duignan (WO 00/72224) in view of Duignan. It would have been obvious to modify the apparatus of Opower to include a target in the form of a web carried in a cassette, because Duignan (page 29) teaches that such a target cassette has numerous advantages such as being easy to ship, handle store, etc.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard Bueker whose telephone number is (571) 272-1431. The examiner can normally be reached on 9 AM - 5:30 PM, Monday-Friday.
